

Protection Relay Cross Reference Guide

Purpose

This technical bulletin is designed to provide a general cross reference guide between RMS, Alstom & Reyrolle product types. When seeking quotations always advise both the RMS & Areva / Reyrolle part numbers.

Case Systems

RMS manufactures case systems suitable for flush, projection and 19" rack mounting complete with draw out modules. Refer to the M Series technical bulletin for full details.

The RMS MATRIX Series relays may be mixed on the same panel with Alstom MIDOS or Reyrolle REYMOS or Reyrolle Epsilon cases using the same mounting hardware.

2M = Size 2 MIDOS or Epsilon case

4M = Size 4 MIDOS or Epsilon case

Relay Data Sheets

RMS technical bulletins are available for each of the relay types listed in the cross-reference chart & for the various case systems available. A complete RMS product catalogue on CD ROM is available on request or go to the RMS web site:

Relay Options

The RMS relay types listed provide function & performance similar to the corresponding Alstom or Reyrolle types. Standard options such as auxiliary voltage, contact arrangement & case style must be specified with order. Variations to the standard specifications are also possible to meet particular customer requirements.

Relay Monitoring Systems Pty Ltd design, manufacture and market a wide range of electrical protection and control products for application on high voltage power systems. The company's depth of manufacturing and engineering expertise is backed up by many years of experience since the formation of its predecessor, Relays Pty Ltd (RPL), in 1955. This experience combined with a broad base of field proven product types enables RMS to service specific customer needs by producing relays on demand and with typically short lead times.
